Flexy Extension Card - 3G+ Modem

This Flexy extension card increase the connectivity capability of the Ewon Flexy with a 3G+ modem.

Many field-based applications do not have access to a wired connection to the Internet, and this is where 3G cellular technology can solve major connectivity problems. The cellular 3G extension card lets you connect the Ewon Flexy to Internet using the GPRS, UMTS or HSPA available network. For your remote access requirements, a simple SIM card with data plan is all you need to connect with our Talk2M cloud-based solution. Secured remote on-line VPN connectivity with your SCADA control centre can benefit from this cellular solution without the burden of a fixed IP address on the remote site.

It is compatible with the Ewon Flexy 10x series, 20x series and 205.

Technical Characteristics

Frequencies	GSM/GPRS/EDGE - 850, 900, 1800, 1900 MHz UMTS/HSPA+ - 800/850, 900, AWS1700, 1900, 2100 MHz
